**Read and conform**  
**safety instructions**  
**before use**

# Description

## Dear Customer

We would like to congratulate you on your new portable/mobile high pressure cleaner and to thank you for the purchase.

To ease your introduction to the use of the cleaner, we have provided the following pages of explanations, tips and hints.

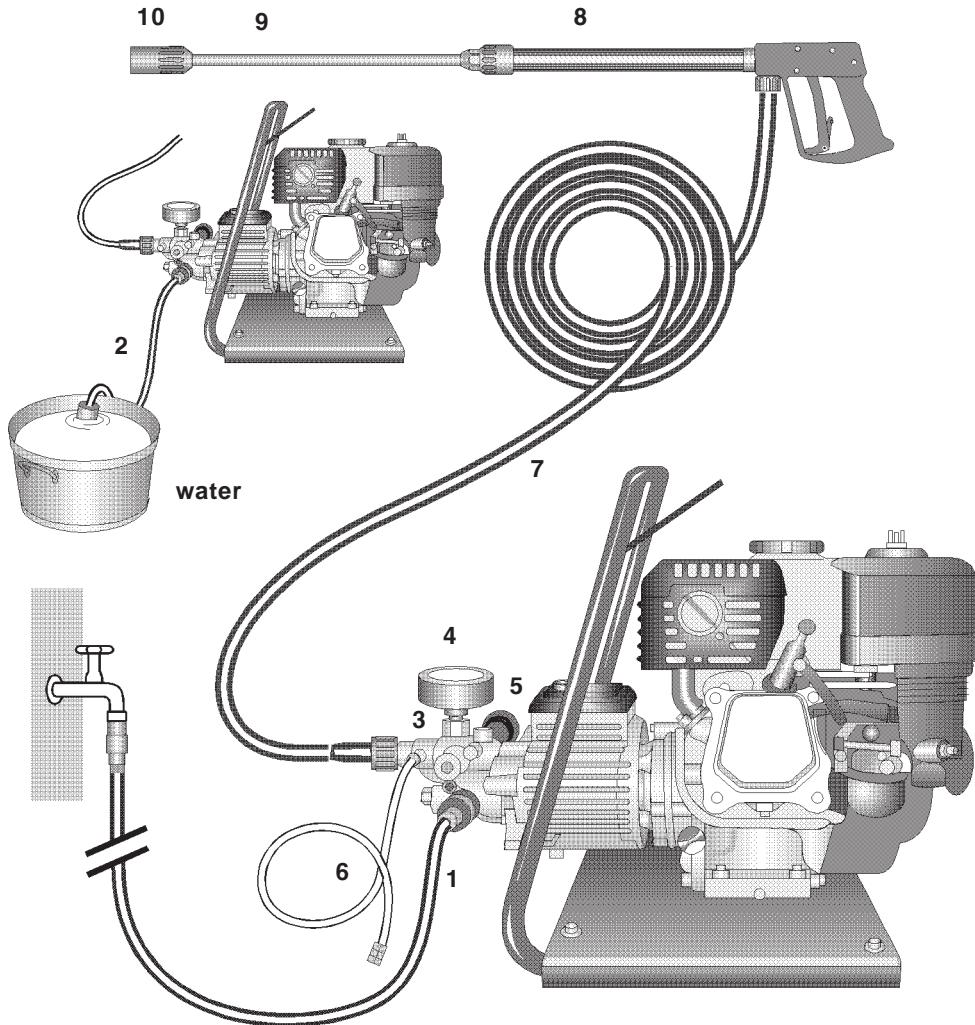

The equipment will assist you professionally in all cleaning tasks, e.g.:

- **facades**
- **flagstones**
- **terraces**
- **vehicles of all types**
- **sheds**
- **barrels and containers**
- **machines**

technical specifications	B 10/200	B 13/150	B 16/220

# Description

## Water - and Cleang - Care System

Water can be connected at mains pressure to the high pressure pump or it can be sucked directly from a storage tank.

The water is then forced under pressure by the high pressure pump to the lance.

The high pressure jet is formed by the nozzle at the end of the lance.

Cleaning and caring agents can be mixed with the water by a low pressure injector.  
(not with B10/200)

**Environmental, refuse disposal and water protection regulations must be observed !**

## Lance with trigger gun

The machine can only be operated when the safety trigger is squeezed.

When the lever ist squeezed, the spray gun opens. The liquid is then pumped to the nozzle. The spray pressure increases and quickly reaches the selected operating pressure.

When the trigger ist released, the trigger gun closes and any further spraying of liquid from the lance ist stopped.

The increase in pressure when the trigger gun is closed causes the unloader valve-safety valve to open. The pump remaines switched on and continues to pump liquid through the pump at reeducated pressure.

When the trigger gun ist opened, the unloader valve - safety valve closes and the pump ressumes pressure spraying from the lance.

The trigger gun is a safety device. Repairs should only be performed by qualified persons. Should replacement parts be required, use only components authorized by the manufacturer.

## Unloader valve - safety valve

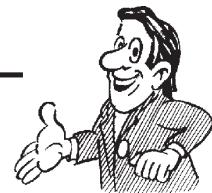

The unloader valve - safety valve protects the machine from a build-up of excess pressure, and is designed not to permit an excess pressure to be selected for operating. The limit nut on the handle is sealed with a spray coating.

The operating pressure and spray rate can be steplessly adjusted by tuning the handle.

Replacements, repairs, new adjustments and sealing should only be performed by qualified persons.

# Description

**For the motor follow the Honda operating manual only.**

## **Motor-safety: (see Honda operating manual)**

Honda motors are safe and reliable if they are operated correctly. Read the operating manual carefully before using the motor and try to understand the contents of the manual completely.

Not following this advice could lead to injuries or damage of the equipment.

To avoid a possible fire hazard and to ensure the necessary ventilation the motor has to be operated at a distance of at least 1 m from buildings and objects. Inflammable objects have to be kept away from the surrounding area of the motor.

Children and pets have to be kept away from the motor, as there is a danger of suffering burns from hot motor parts and to be injured by equipment driven by the motor.

Get to know the motor and especially learn how to switch it off quickly. Do not allow persons to operate the motor who are not familiar with it.

## **Setting up: Location**

Neither set up and operate the machine in rooms where there is a risk of fire or explosion nor put it into puddles. Do not use the machine under water.

## **CAUTION !**

Never use liquid containing solvents such as paint thinners, petrol, oil or similar liquid matter. **Pay attention to the instructions of the manufacturers of the cleaning agents.** The seals in the machine are not resistant to solvents. The spray of solvents is inflammable, explosive and poisonous.

## **CAUTION !**

When running your high pressure cleaner with hot water of 70° C raised temperatures occur.

**Do not touch the machine without safety gloves.**

# Description

## Brief operating instructions

1. Connect the high pressure hose with spray gun and machine.
2. Connect the suitable water supply.
3. Flush the air from the pump (open and close the spray gun several times).
4. Switch on the motor while the spray gun is open and commence cleaning.
5. After completing the work, completely empty the pump (switch the motor on for approximately 20 seconds without the suction and pressure hose).  
Afterwards you can roll up the high pressure hose.  
- Only use clean water ! Protect from frost !

## **CAUTION !**

Please pay attention to the regulations of your waterworks company.

In accordance with DIN 1988, the machine may not be directly connected to the public drinking water supply lines.

A brief connection however is permissible according to DVGW (German Association for Gas and Water Affairs) if a tube ventilator with check valve (KRÄNZLE Order-No. 41.016 4) is built into the water supply.

Also indirect connection to the public drinking water supply lines is permissible by way of free emission in accordance with DIN 1988, part 4; e.g. by using a reservoir with a float valve.

Direct connection to a non-drinking water supply line is permissible.

## **High pressure hose and spray device**

The high pressure hose and spray device supplied with the machine are made of high grade material, they are also optimized for the machine and marked as required by the appropriate regulations.

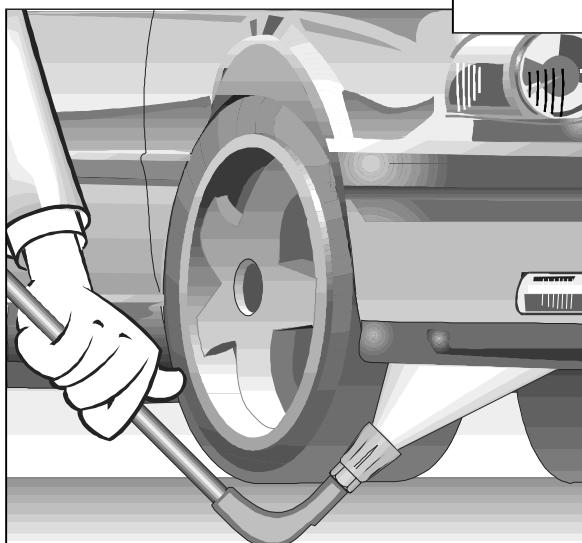

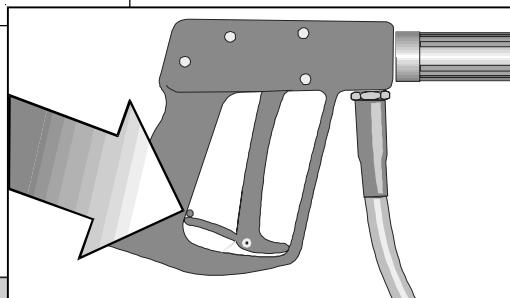

*If replacement parts are required, only such parts that are authorized by the manufacturer and which bear the markings required by the appropriate regulations may be used. The high pressure hose and spray device must be connected in a pressure-tight manner. The high pressure hose may not be driven over, pulled excessively, or twisted. The hose may under no circumstances be pulled over sharp edges, since otherwise the guarantee is automatically void.*

# **Safety notes**

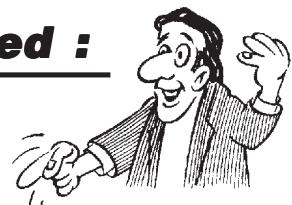

**As to the recoil -  
see notice on page 2.**

**Apply the safety catch on the  
spray gun after each use, in  
order to prevent  
unintentional spraying.**

**Always aim the  
underbody lance. Note  
when using an angle  
underbody lance, like  
for example lance  
No. 41.075, that there  
is a certain amount of  
torque (twisting  
motion) in the recoil.  
(See also notice on  
page 2).**

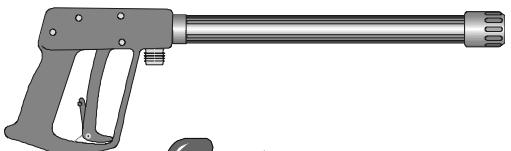

# **This is what you've purchased :**

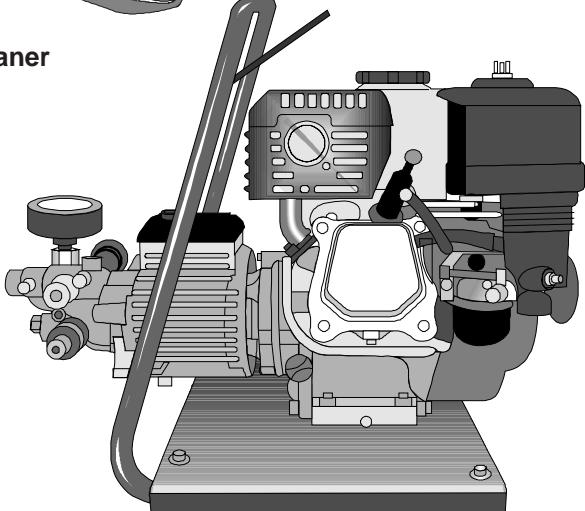

1. Spray lance with regulator and high pressure nozzle, flat spray (B10/200 only with dirt-killer, vario-jet)

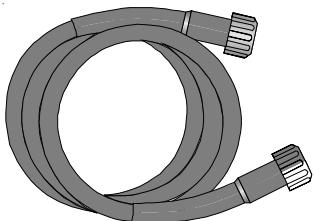

2. Spray gun with insulated pistol grip and screw connection

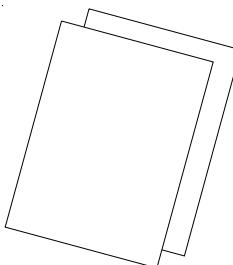

3. KRÄNZLE - High pressure cleaner  
B 10/200 B 13/150 B 16/220

4. High pressure hose 10 m  
15 m HP-hose for cleaners with hose drum

5. Operating instructions pump  
Operating instructions motor

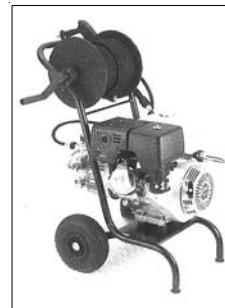

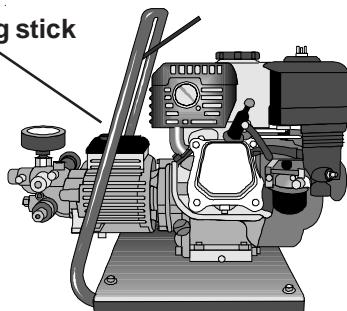

6. Water inlet components

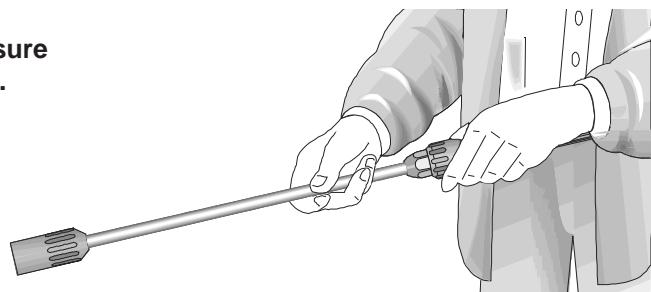

# **Prepare for use**

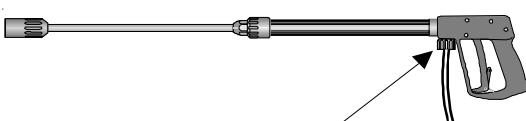

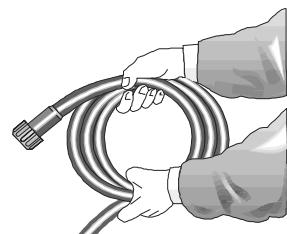

**1. Oil-measuring stick**

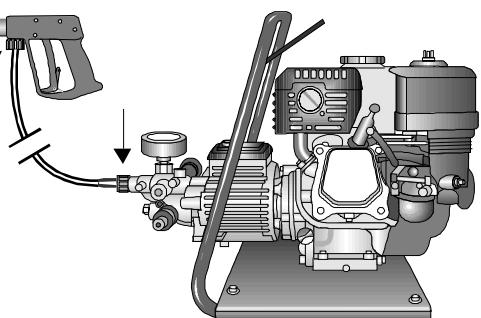

**2. Connect the high pressure lance to the spray gun.**

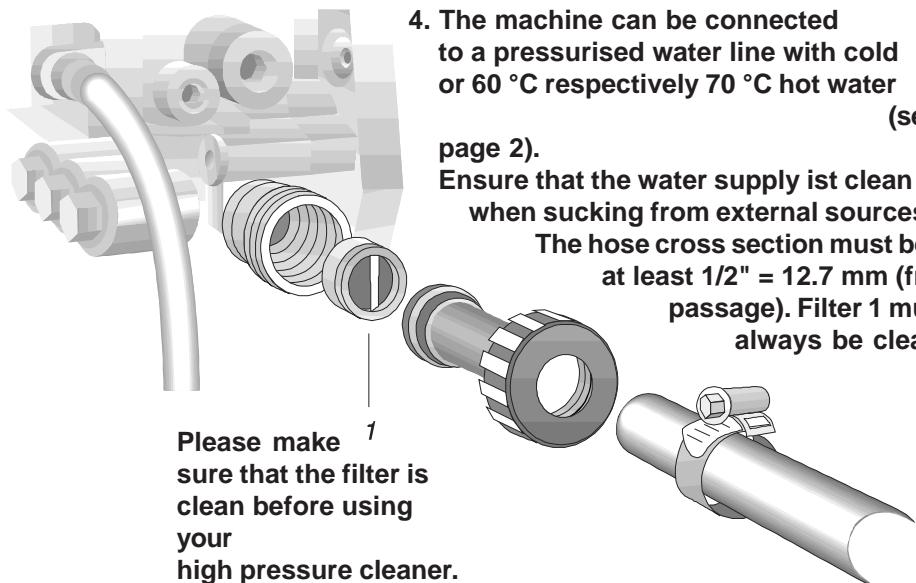

**3. Unwind the high pressure hose without leaving kinks or "nooses" and connect it to the spray gun and pump. When using extension hoses, use max. 20 m high pressure hose, or 2 x 10 m with hose connectors.**

**The high pressure hose connected from the machine to the lance.**

# **Preparation for use**

Please make  
sure that the filter is  
clean before using  
your  
high pressure cleaner.

4. The machine can be connected to a pressurised water line with cold or 60 °C respectively 70 °C hot water (see page 2).

Ensure that the water supply ist clean when sucking from external sources.

The hose cross section must be at least 1/2" = 12.7 mm (free passage). Filter 1 must always be clean.

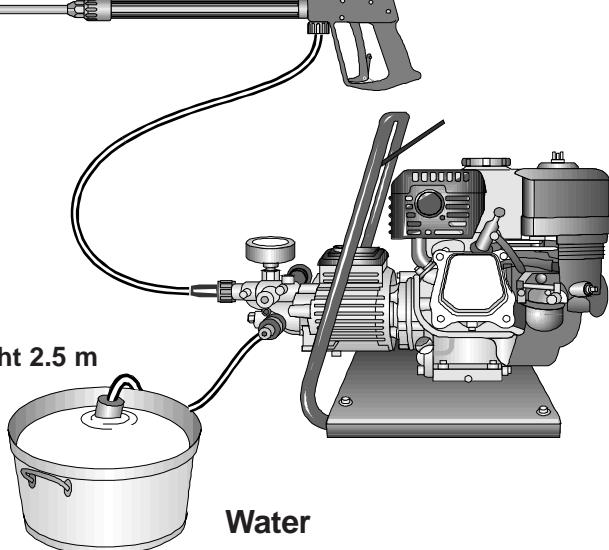

## **CAUTION !**

When running your high pressure cleaner with hot water of 70° C raised temperatures occur.

***Do not touch the machine without safety gloves.***

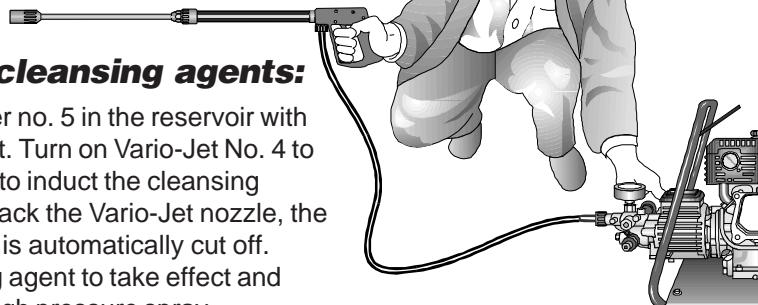

5. Maximum induction height 2.5 m  
- see technical data on page 2.

# **Preparation for use**

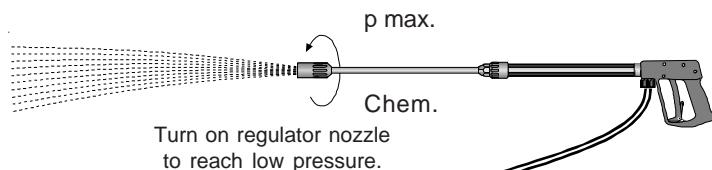

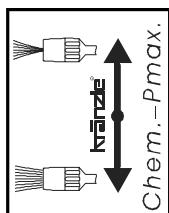

## **Adjusting the pressure**

This is accomplished by turning the handwheel. The default setting is maximum pressure.

## **When using cleansing agents:**

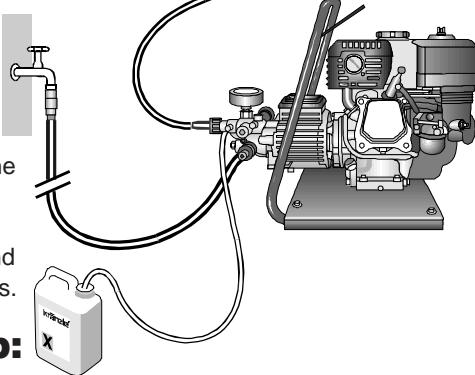

Place chemical filter no. 5 in the reservoir with the cleansing agent. Turn on Vario-Jet No. 4 to enable the injector to induct the cleansing agent. By turning back the Vario-Jet nozzle, the supply of chemical is automatically cut off. Allow the cleansing agent to take effect and then remove with high pressure spray.

A mixing ratio of 3-5% is achieved when the Vario-Jet is fully turned on. pH value neutral 7-9.

Note that you must always comply with the instructions provided by the manufacturer of the cleansing agent (e.g. instructions concerning safety clothing) and the water protection regulations.

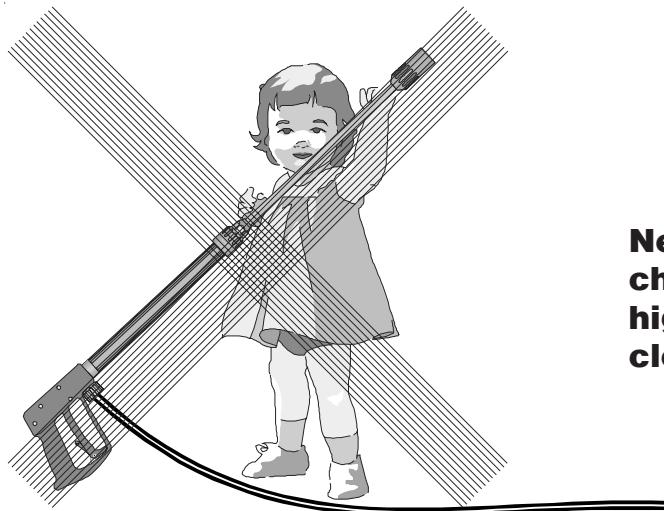

## **To shut down the pump:**

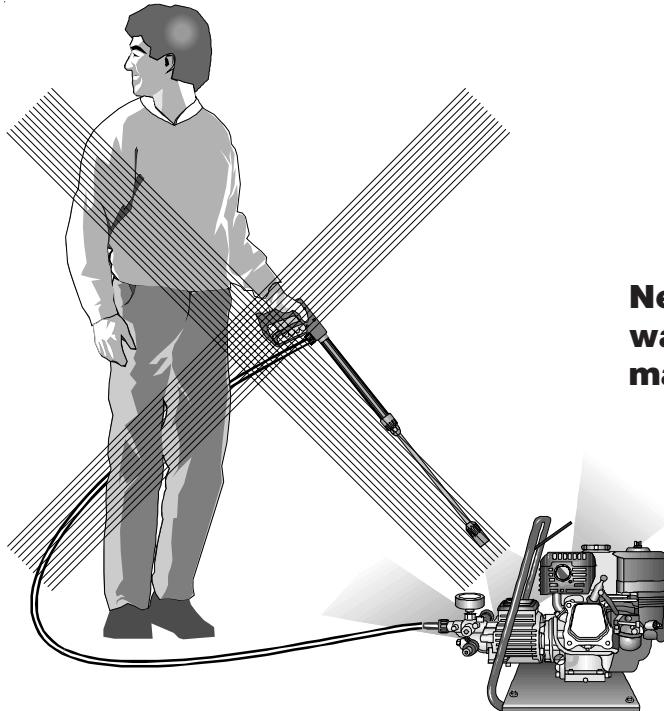

1. Switch off the machine
2. Cut off the water supply
3. Open the spray gun briefly until the pressure is released
4. Apply the safety catch on the spray gun
5. Remove the water hose and high pressure hose
6. Drain the pump: switch on the motor for approx. 20 seconds
7. Winter: store the pump in rooms above 0° C
8. Clean the water filter

## ***This is prohibited***

---

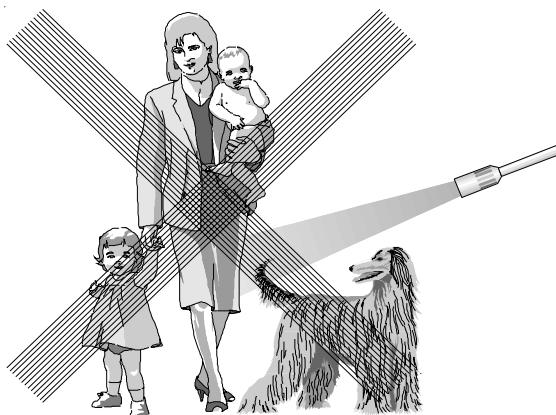

**Never allow  
children to use the  
high pressure  
cleaner !**

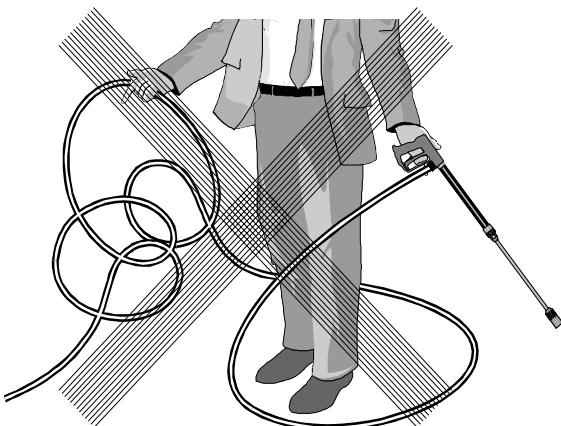

**Never direct the  
water jet at the  
machine itself !**

## **This is prohibited**

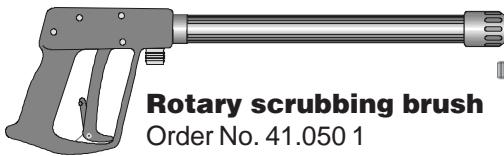

**Never direct the  
water jet at people  
or animals !**

**Never pull the high  
pressure hose if it  
has formed kinks or  
"nooses"!  
Never pull the hose  
over sharp edges !**

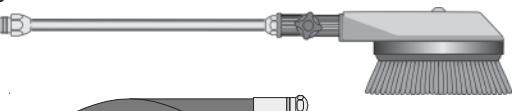

# **Additional KRÄNZLE accessories**

(not with B 10/200)

## **Rotary scrubbing brush**

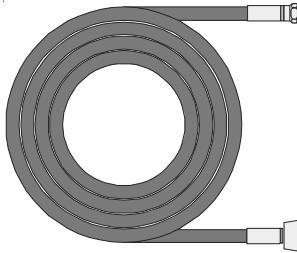

Order No. 41.050 1

## **Drain and pipe cleaning hose**

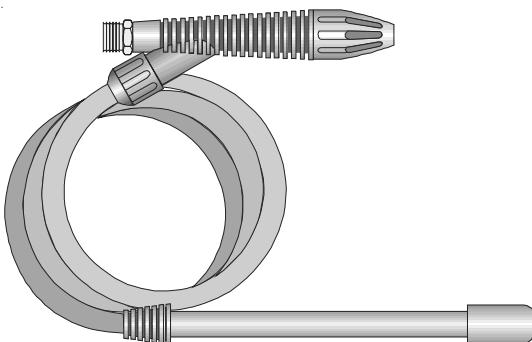

8 m - Order No. 41.051

15 m - Order No. 41.058

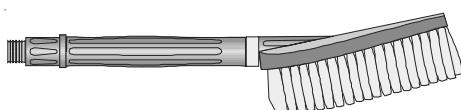

## **Underbody lance, new**

Order No. 41.075

## **Sandblaster**

Order No. 41.068 1

## **Flat brush**

Order No. 41.073

## **Dirtkiller**

## **B 10/200**

Order No. 41.073 8

## **B13/150**

Order No. 41.072 5

## **Turbokiller**

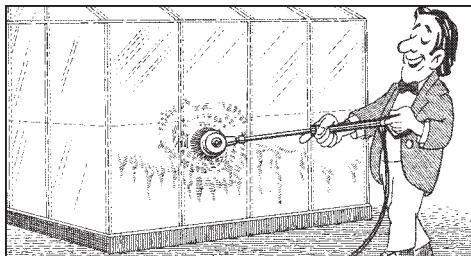

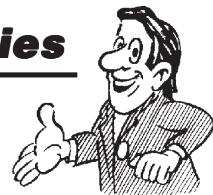

## **B 16/220**

Order No. 41.072 4

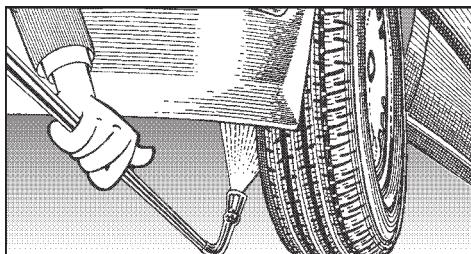

**Environmental, refuse disposal and water protection regulations must be observed when using the accessories.**

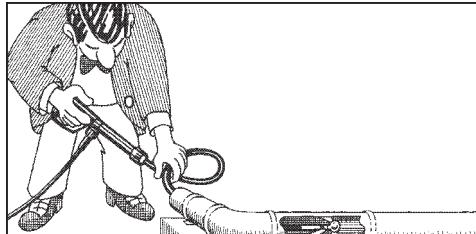

## **for further combination possibilities**

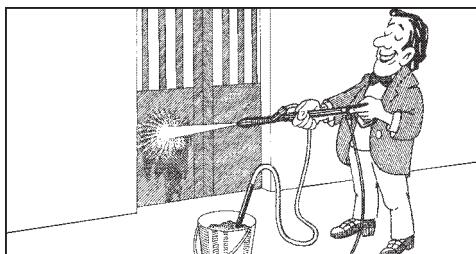

Car cleaning, glass, caravan, boat etc.:  
rotary washing brush with 40 cm extension  
and  
ST 30 nipple M 22

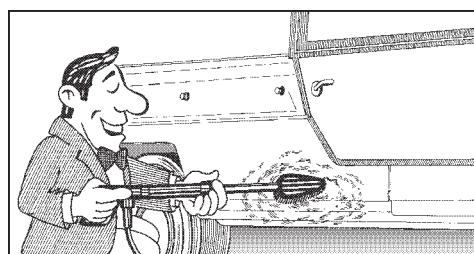

Underbody cleaning of cars, trailers and  
equipment: lance 90 cm with high pressure  
nozzle and ST 30 nipple. The lance must  
be aimed when spraying.

Cleaning pipes, channels and drains: Pipe  
cleaning hose with KN nozzle and  
ST 30 nipple M 22.

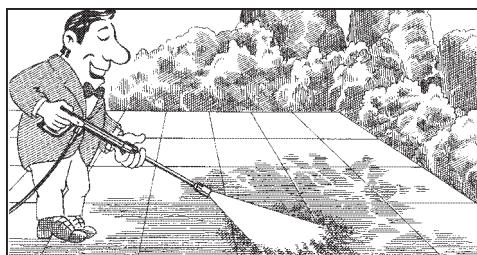

Blasting old paint, rust and facades:  
sandblasting injector with suction lance and  
3 m PVC hose and ST 30 nipple M 22.

Cleaning cars and all smooth surfaces:  
brush with ST 30 nipple M 22.

**When sandblasting you must  
wear protection clothes! Pay  
attention to the instructions of  
the manufacturer of the  
abrasive.**

Rotary point sprayer for extreme soiling:  
dirt killer with 40 cm extension and  
ST 30 nipple M 22.

## ***Small repairs -***

### **You only get a weak flow of water or no water at all !**

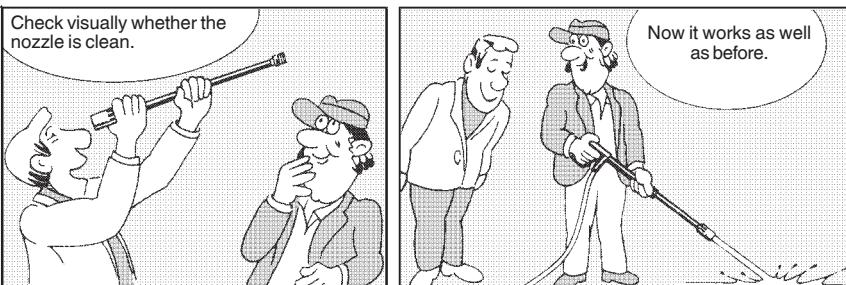

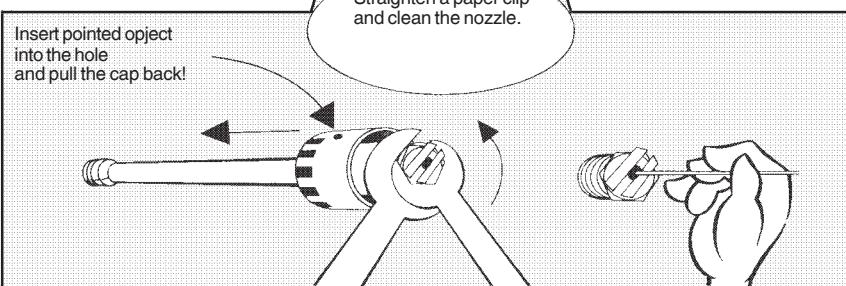

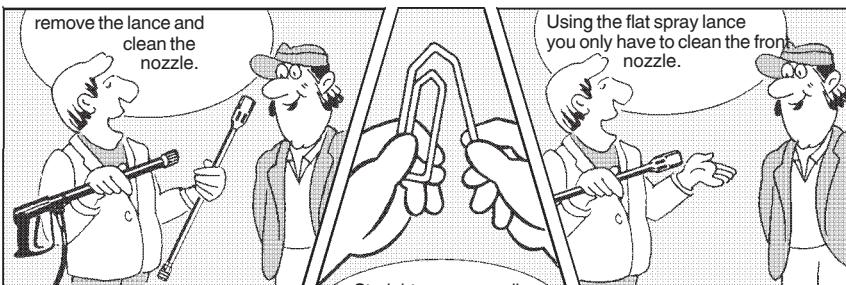

- The pressure gauge shows a 10% higher pressure than the working pressure.

# **Do it yourself !**

## **The nozzle is blocked !**

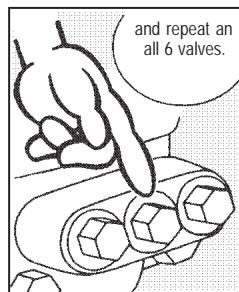

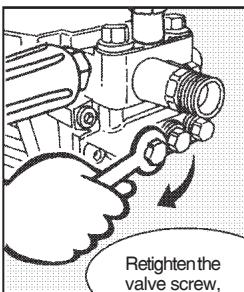

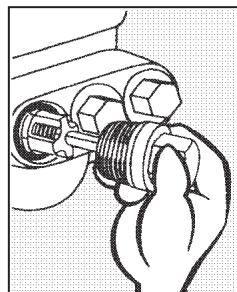

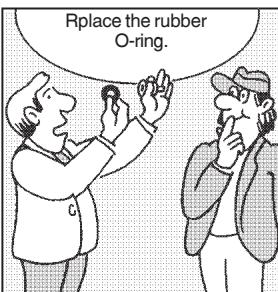

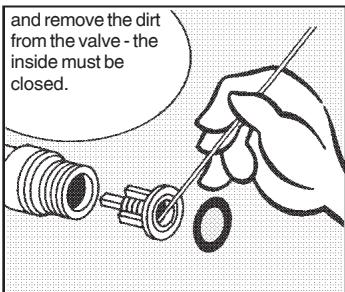

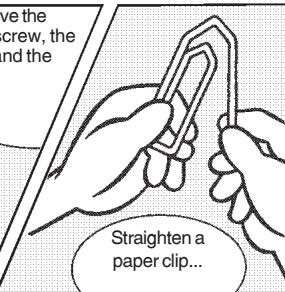

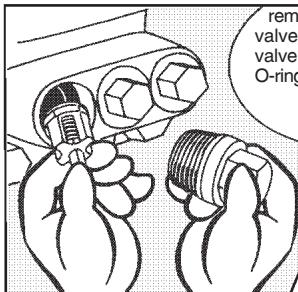

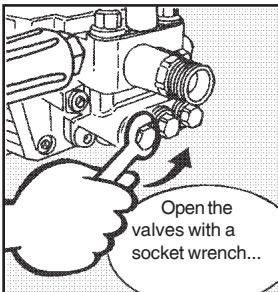

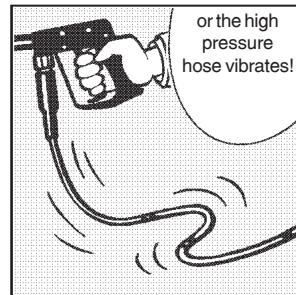

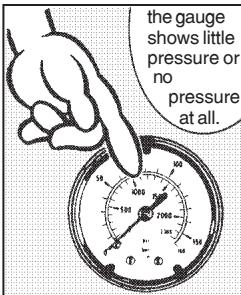

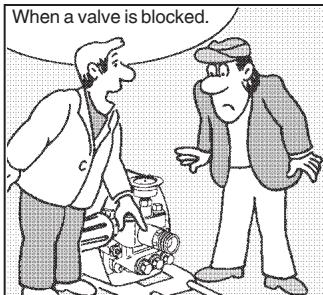

- No water but the gauge shows full pressure.

# **Small repairs - Do it yourself !**

## **Valve dirty or sticky !**

- Pressure gauge does not show full pressure.
- Water comes out in spurts.
- If you do not use the high pressure cleaner for some time the valves can stick.

# **General rules**

## **Inspections:**

The machine must be inspected according to the "Guidelines for Liquid Spray Devices" at least once every 12 months by a qualified person, to ensure that continued safe operation is guaranteed. The results of the inspection are to be recorded in writing. This may be done in any form.

## **Accident prevention**

The machine is designed for accidents to be impossible if used correctly. The operator is to be notified of the risk of injury from hot machine parts and the high pressure water jet. The "Guidelines for Liquid Spray Devices" must be complied with. (see page 12 and 13)

## **Check the oil level with the oil-measuring stick prior to each use.**

### **(Ensure horizontal position!)**

#### **Oil change B10/200 ; B13/150:**

No oil change is required during the working life of the machine. However, should it be necessary to change the oil in the event of repairwork, the oil sight glass is to be opened over a reservoir and the machine to be emptied. The oil is to be caught in the reservoir and disposed of in the approved manner.

New oil: 0,5 l - Motor oil W 15/40

#### **Oil change B16/220:**

The oil of your high pressure pump should be changed after approx. 40 hours of operation, or no later than when it takes an a grey or whitish colour. Open the oilplug over a container and drain off all the oil. The oil must be caught in a contianer and disposed of in a responsible, legal manner.

New oil: 1,0 l - Castrol Formula RS

## **Warranty**

This warranty covers material and/or workmanship related defects only and does not extend to ordinary wear.

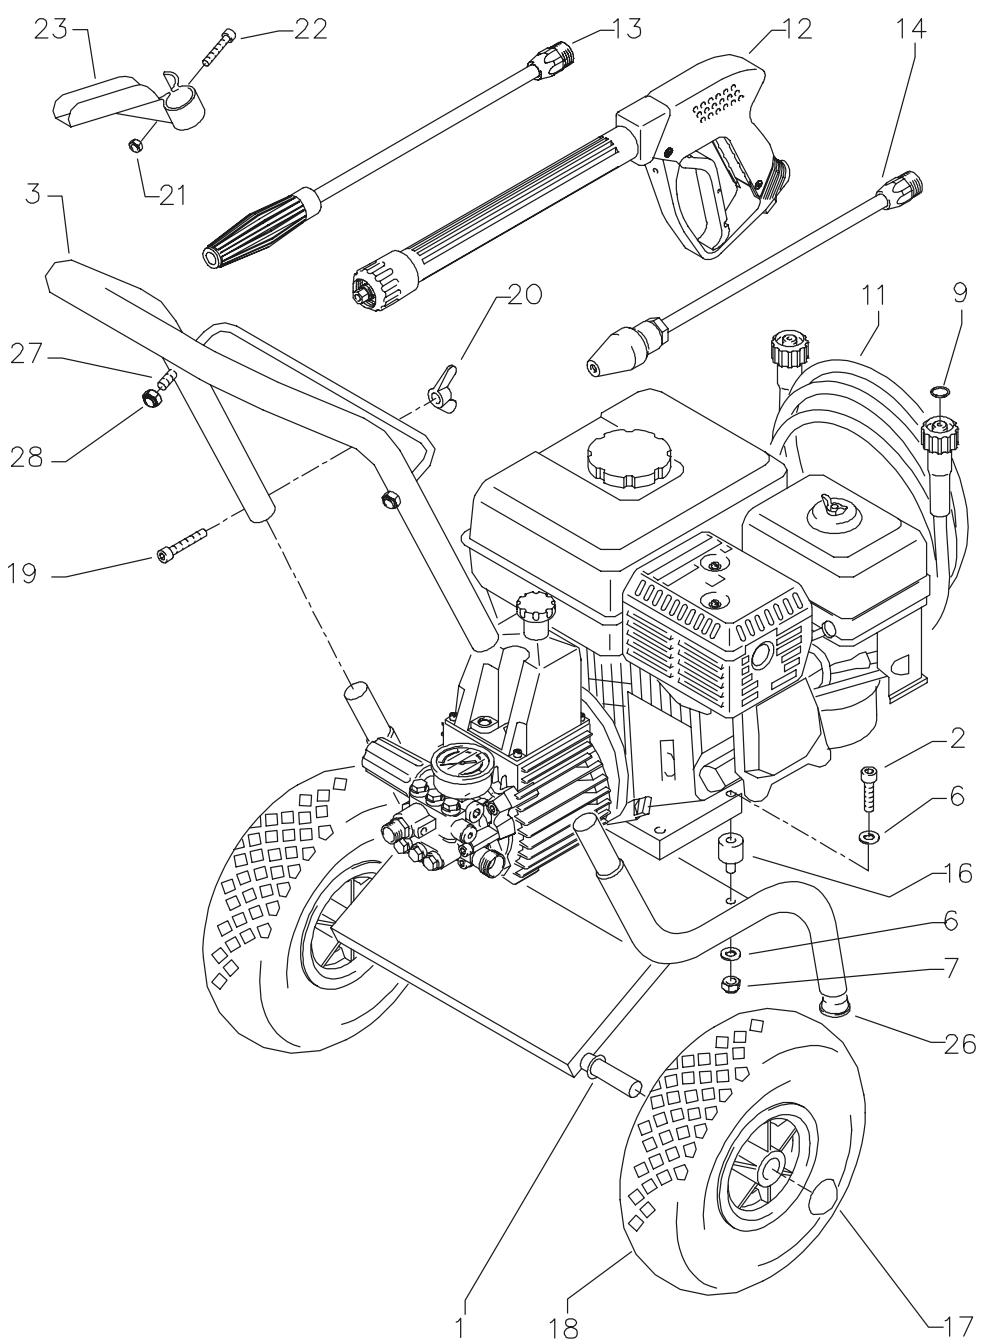

Machine must be operated according to enclosed operating instructions which are part of present warranty conditions.

All products sold directly to private customers are warrantied for a period of 24 months, whereas the warranty period for industrial purchases is limited to 12 months.

In case of any warranty claims, please have your HP cleaner together with accessories and your purchase document ready and contact your nearest dealer or authorized service point which can also be looked up in the internet at [www.kraenzle.com](http://www.kraenzle.com) .

Warranty is void in case of attempts to modify any of the safety devices or in the event of exceeding temperature or rpm limits - this also applies to undervoltage, low water and/or polluted water. Gauge, nozzle, valves, sealing gaskets, high pressure hose and spray equipment are considered wear parts and do not fall under this warranty.

**Dirtkiller 03 with Lance (B10/200)** **41.073 8**

# ***Inspirection report***

## **for KRÄNZLE - High Pressure Cleaners**

**Regular inspection every 12 months if used professionally!**

Appliance No:

Type:

The following must be checked:

### **1. Safety features**

- a) Manometer
- b) Safety valve (pressure control)
- c) Operating pressure
- d) Cut out pressure (max. 10% above operating pressure)
- e) Low pressure with trigger released

### **2. General condition**

- a) High pressure hose
- b) Spray gun
- c) Motor
- d) Oil level

**The information in the operating instructions are a part of the inspection**

Excerpt from the Guidelines for Liquid Spray Equipment (ZH 1/46) by the Central Office of the Professional Trade Association.

Inspection:

Liquid spray equipment should be inspected for safe operation by a qualified person whenever necessary, but no less than every 12 months. The maker's or supplier's instructions must be followed. The inspection intervals may be extended if the equipment is not in active use.

In Germany, inspections compliant with the (German) Emission Controls Act may be required for oil and gas-fired equipment, and the owner must arrange for these to be carried out independently of the main inspection.

The results of inspections must be recorded in writing and presented to the respective authorities on demand. There is no set form for these records.

## EC declaration of conformity

We hereby declare,  
that the high-pressure models:

(techn. documentation available from):

comply with the following guidelines and specifications and their amendments for high-pressure cleaners:

Kräntzle B10/200 - B16/220
